## **LAUSD Update Regarding My Integrated Student Information System (MiSiS)**

**Los Angeles** - Today marked the opening of the second semester for most Los Angeles Unified School District schools. To ensure students were in class ready to continue learning, the District implemented a strategic support plan to assist schools with enrollment, scheduling, and attendance using My Integrated Student Information System. We deployed hundreds of employees to school sites according to anticipated need, increased IT HelpDesk resources, and closely monitored progress throughout the day. As of 2:00 P.M., no significant issues were reported related to appropriate placement of students in classes.
